

Style, Performance, Service. That's the Fypon® advantage.

BENEFITS

- Four wood-grained styles - Rough Sawn, Hand Hewn, Mesa and Tahoe - offer rustic charm without the hassle of wood.
- Fypon Beams are lightweight, low maintenance and easy to install. They won't warp, crack, rot or split like wood.
- Offer a realistic wood texture that's difficult to distinguish from real wood.
- Available in lengths measuring 8' to 24', in 2' increments.
- Add Beam Plates or Straps with appearance of realistic nuts and bolts that provide authentic details.
- Perfect for both interior and exterior applications.
- Use Fypon wood-grained Beams to build a custom ceiling truss system.

FYPON BEAMS VS. WOOD BEAMS

- Fypon Beams are easy to install and are approximately five to seven times lighter than wood, requiring less labor.
- Save \$16 or more per foot using Fypon Beams vs. a real wood beam.
- Structural support not required, which makes for easy installation with blocking.
- Wide variety of design options.

BEAM FEATURES

AVAILABLE SIZES & STYLES

- 4" x 6", 6" x 8", 8" x 10"
- Minimum 8' to maximum 24' length
- Available in 2' increments
- 10" x 15" x 234" (Mesa only)
